PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with 4+ years of experience building scalable web applications and backend systems using Golang, Laravel, Node.js, and React. Experienced in API development, cloud infrastructure, database optimization, and AI-assisted development workflows, leveraging LLMs to accelerate engineering tasks, prototyping, and feature delivery while maintaining scalable and reliable system architecture.

PROFESSIONAL EXPERIENCE

Backend Engineer | *AlphaSquad, Islamabad* | Jan 2025 – Present

- Built and maintained scalable applications using **Golang, Node.js, NestJS, Laravel, React, and Next.js**
- Handled multiple projects simultaneously from development to deployment, collaborating directly with clients and internal teams
- Worked both independently as a solo backend engineer and collaboratively with Senior and Lead Software Engineers
- Designed and optimized solutions using **MySQL, PostgreSQL, MongoDB, Redis, Firebase, and Supabase**
- Developed **RESTful APIs** and integrated multiple third-party platforms and external APIs
- Integrated payment systems including **Stripe** and **PayKickstart** for subscription and transaction workflows
- Optimized application performance by migrating heavy processing tasks including PDF generation, AI/LLM operations, and background workloads from an ElectronJS application to scalable backend services using Golang **asynq** and Node.js **BullMQ** job queues
- Worked on legacy multi-tenant PHP systems where platform-wide changes could impact multiple clients and their customers
- Developed proof-of-concept (POC) applications to validate client ideas, rapid feature experimentation, and business workflows
- Used AI-assisted development workflows and experimented with tools including *Claude Code, Codex, Cursor, Windsurf, Copilot*, and other LLM-powered environments to accelerate development, prototyping, debugging, documentation, and repetitive engineering tasks
- Managed deployments and AWS infrastructure including **EC2, S3, SES, CloudFront, Route53, SNS**, and monitored AWS alert systems
- Containerized applications using **Docker** to streamline development and deployment workflows
- Managed deployments, post-deployment issue resolution, **Sentry** monitoring, and critical bug fixes across staging and production environments

- Owned backend systems across multiple projects, handling architecture, deployments, production stability, and ongoing maintenance end-to-end
-

Junior Web Developer | *Viral Webbs, Islamabad* | Oct 2022 – Nov 2024

- Developed accessible **EPUB** publications using **HTML**, **XHTML**, and **CSS** for multiple e-reader platforms
 - Validated EPUB compliance and accessibility standards using **Kindle Previewer**, **Ace by DAISY**, and **Thorium Reader**
 - Developed and maintained features for internal book production and publishing management systems used as the primary source of truth for publication workflows
 - Maintained and enhanced author websites with a focus on responsiveness, usability, and performance
 - Built backend features using **Laravel**, **CodeIgniter**, and **MySQL**
 - Customized **WordPress** themes and plugins based on project requirements
 - Managed deployments, troubleshooting, and server-side operations through **Linux**, **FTP**, and **SSH** environments
-

Computer Lab Assistant | *Corvit Systems, Islamabad* | Oct 2020 – Oct 2021

- Assisted instructors during networking and lab sessions to support hands-on technical training
- Helped students configure and troubleshoot routers, switches, and firewall setups
- Prepared and maintained networking lab environments for practical sessions and examinations
- Managed hardware inventory and ensured equipment functionality

TECHNICAL SKILLS

Programming Languages: Golang, PHP, JavaScript, C++, C

Frameworks & Libraries: Laravel, CodeIgniter, Node.js, NestJS, React, Next.js, WordPress

Databases: MySQL, PostgreSQL, MongoDB, Redis, Firebase, Supabase

Cloud & DevOps: AWS (EC2, S3, SES, CloudFront, Route53, SNS), Docker, Git, Linux/SSH

APIs & Integrations: REST APIs, Swagger/OpenAPI, Stripe, PayKickstart, Zoho, Clio, OpenAI/Gemini API

Other Tools: HTML, XHTML, CSS, Bootstrap, jQuery, FileZilla, Cisco Packet Tracer, GNS3, PuTTY

EDUCATION

Virtual University of Pakistan

Associate Degree Program (ADP) in Computer Science

2024 | CGPA: 3.85 / 4.00
